

# TAIL TOWELZ!

## CLEANING AND PRODUCT CARE

Cleaning and taking care of your Tail Towelz is quite easy.

**Between Dog Cleaning:** Tail Towelz are used to remove excess water from a CLEAN dog. The Towelz should not be used on a dirty dog or any dogs without a full cleaning. However, in the event you need a quick clean of the Towelz between dogs, you can simply spray each Tail Towelz with Fido's Favorite Shampoo (16:1 dilution). Then completely rinse with clean water and begin using again.

**End of Day Cleaning:** At the end of the day, place all Towelz in a bucket filled with water and Fido's Favorite Shampoo (16:1 dilution) let soak for about 5-8 minutes and then rinse each towelz with water until all shampoo product is removed. **DO NOT DRY IT IN THE DRYER.** Air drying may be your best option but keep in mind that it will be stiff like cardboard when dry. To return the towel to its original softness, just wet it again.

**End of Month Cleaning:** Simply throw them in the washing machine with a warm water wash, mild liquid detergent and extra rinse. Or soak overnight like you would the end of day cleaning, however add ½ cup of white vinegar. **DO NOT DRY IT IN THE DRYER.** Air drying may be your best option but keep in mind that it will be stiff like cardboard when dry. To return the towel to its original softness, just wet it again.

Tail Towelz are made from a biodegradable, antibacterial and antifungal material, thus they are not affected by mold, odor, or mildew. If Towelz should develop mold or mildew (brown, black, or green spots), wash the product with liquid detergent and ammonia. If stains or odor should still be evident, soak in a 5:1 solution (5 parts water for 1 part bleach) for about 5 minutes. NOTE: Product color may change - test for fastness. Wash or launder immediately. **DO NOT DRY IT IN THE DRYER.**
